

Crepes with Maple Syrup & Butter

Golden, versatile crepes for sweet or savoury cravings

Yield: ~12 crepes | **Time:** 10 min prep · 1 min per crepe · 12–15 min total cook

Serve warm. Don't complicate it.

Ingredients

- 6 eggs
- 1 TBLS castor sugar (*optional – for savoury = 1 tsp salt*)
- 30 ml vegetable oil (*1½ tablespoons*)
- 500 ml full cream milk
- 250g plain flour, sifted. Bakers flour is best.

Method — *Pick your weapon. Do it your way.*

Mixing Tips — REAL TALK:

- **Using a stand mixer, Ninja, or Kenwood?**
Throw everything in — flour, eggs, milk, oil, sugar — all at once. **Start on low**, unless you enjoy redecorating your kitchen in raw crepe. Once things settle, **increase the speed to mix thoroughly** until the batter is smooth and lump-free. Easy. Done. No drama.
- **Whisking by hand?** Start with the **wet ingredients** — eggs, oil, sugar, milk. Whisk until smooth. Then gradually sift in the **flour**, whisking constantly to avoid lumps. Slow and steady wins the batter.
- **Wooden spoon like it's 1995?** No steps. No rules. Just chuck it **all in together** — wet, dry, the lot — and stir like your arm's got something to prove. No lumps if you commit. Just a strong wrist and a batter you can be proud of.

Once you've got a silky, pourable batter:

1. Heat a non-stick pan over medium. Swirl in a bit of oil, then allow to heat until you see a blue wisp of smoke. That's your pan saying, "Let's do this." Wipe out excess then return to the heat. (Medium-low)
2. Pour in a ladle of batter, swirl to coat the pan in a thin layer.
3. Cook for until the edges lift and the base turns golden. Flip. (Pro Tip. When the batter is dry on top it is time to flip it...) about 30 seconds
4. Cook the second side for 15–30 seconds. Stack and cover as you go.
5. First crepe is always a disaster? Give it to the dog. They've been waiting for this moment. Let it cool for them, they have feelings too....

Fillings — *Do your worst (or best)*

- Nutella
- Banana slices
- Strawberries

 *Warm crepes in the microwave for 10 seconds. No regrets.*

Toppings — *Pile it on, no shame here*

- Lemon juice & honey
- Golden syrup
- Whipped cream & berries
- Maple syrup & butter (*forever the classic*)

Chef's Notes:

- Makes about 12 crepes. Halve it if you're flying solo (but why would you?).
- Freeze leftovers: layer with baking paper and seal airtight.
- **Blue smoke = only for the first heat-up.** After that, medium heat and confidence.
- Keep cooked crepes covered so they stay soft and flexible.

 Savoury Version:

Skip the sugar. Add a pinch of salt. Fill with eggs, cheese, spinach, mushrooms — or whatever needs rescuing from the fridge.

Crepes don't care how fancy your gear is. They just want heat, a pan, and someone who's hungry. Mix it, cook it, eat it. Then do it again. 🔪

Cooked once. Nailed it. Always repeated.
